

Lab 7

Name- Adarsh Nandanwar
BITS ID- 2018A7PS0396G

Usage Instructions

1. Install OpenSSL library.
2. Open a terminal window in the directory containing `client.c` file.
3. Compile the c program.

```
$ gcc client.c -o client -lcrypto -lssl
```

4. Execute the executable.

```
$ ./client  
https://raw.githubusercontent.com/torvalds/linux/master/README  
$ ./client  
https://raw.githubusercontent.com/git/git/master/Documentation/git.txt  
$ ./client http://www.example.com/sample.html
```

5. Files will be downloaded in the current working directory.
